

Needed Tools

- A 50/50 solution mixture of rubbing alcohol and distilled water in a squirt bottle
- 100% cotton rag (possibly an old t-shirt). **It must be pure cotton!!**
- Cotton swabs (Q-Tips)

Steps

- Spray some of the mixture on to the rag. **Do not spray the screen!!!**
- Gently rub in a steady one pattern motion, either clockwise or counterclockwise. **Do not use too much pressure.**
- Spray a bit on a cotton swab and again gently, get in to the areas the cloth could not reach.
- If there is any remaining moisture on the screen gently wipe with a dry section of your 100% cotton rag.
